DATED 2-7-28

[Despatch Abstract.]

tlement - Resettlement (Bellary) Bellary Taluk - Rupanagudi Village
istry as double crop wet lands - Petition - Orders passed.

R. Krishnamurthy.

R. Narasimhaiah

K. Krishna Murthy

R. Narayana Rao

R. Veerabhadra Rao

Reparagraphing. Village Patel Village of

this petition raises a question which I have mentioned once or

twice to my Hon colls.

Some one wet lands runar stream channel in this village

people have to work harder in Kharif than they can irrigate their fields

prior to resettlement then fields had a favourable [illegible]

than which were registered as double crop wet. It was 1/3

or 1/4 in wet assessment. After resettlement, the rate

has been fixed at 12. now let us grant that the fields

were registered as single wet that the owners raised a

[illegible] crop. [illegible] would not be charged more than 1/2 wet as

[illegible] 1/4, in any year they did not raise a wet crop they

would be charged the additional charge. The ryots petitioned that

their fields may be registered as single wet but this has not been

done so far. I think that the fields concerned should be

registered as single wet, for the usual wet rate or as double

wet [illegible] favourable rate. Some correspondence has taken

place [illegible] I shall be glad to see the papers with the

[illegible] of my Hon colls. C.

Read the following:-

Letter from C.D'A.Crofton Esquire, I.C.S., Collector of Bellary, I.Dis.C.No.255/28-A-3, dated 31st January 1928.

Board's Reference F.105/28-1 dated 6-1-28.

The extent in question was compounded double crop land paying assessment at ¾ the single crop wet assessment. During the resettlement it was registered as permanent double crop land assessed at 1½ times the single crop wet assessment. I enclose the marginally noted accounts for reference and return.

List of enclosures.

Register No.IV (8) I.
Double crop cultivation statement.
IV 8 K. Irrigation statement.
Fair adangal three volumes.

Resolution

Submitted to Government with reference to their Memorandum No.3621 B/27, dated 20th December 1927.

2. Prior to 1918 only lands under first class sources which usually receive an assured supply for two crops were compulsorily registered as double crop' In paragraph 10 (a) of the notification for the resettlement of the South Arcot District issued in G.C.No.1023 Revenue, dated 13th March 1918, the condition that such registry should be confined to lands under first class sources was omitted - Vide also para. 2 (2) of Board's Reference No.295 dated 25-2-1918, printed on page 2 of the G.O. Under para. 17 (a) of the resettlement notification issued for the black soil taluks of Bellary and Anantapur in G.O.No.1677 Revenue, dated 12-9-1922 which was based on that issued for South Arcot, lands which in all ordinary seasons have an unfailing supply of water for two wet crops should be registered as "double crop" at one and a half times the single crop assessment, irrespective of the classification assigned to the irrigation source. An extent of 161.70 acres in Rupanagudi village was accordingly registered as 'double crop' as the supply in the irrigation source is ordinarily sufficient to allow of two wet crops being raised on them in ordinary seasons.

The Collector states that this extent was prior to the resettlement registered as 'compounded double crop assessed at mes the single crop assessment. This does not seem to be quite correct as the statement of double crop cultivation shows that S.Nos.1-3 & C, 106 A, 109, 111 and 112 A were 'single crop wet' lands prior to the resettlement and in that case they would have been paying one and a half times the single crop assessment for the cultivation of two crops.

Read the following:-

Letter from S.Venkateswaran Esq., I.C.S., Collector of Bellary No.L.Dis. C.1271/28 dated 6th May 1928.-

Settlement-Resettlement -Bellary taluk- Rupanagudi village- Registry as double crop.

Board's Ref- No. F.1424/28-1 dated 27-8-28.

The accounts show that the extent of the land compounded at one and onefourth of the single crop wet assessment was 163-62 acres prior to the resettlement. The resettlement staff has omitted an extent of 4.04 comprised in S.Nos.136 A &B from the list prepared by them. The reason is not known. The total extent now registered as permanent double crop land assessed at one and a half times the single wet assessment is 163-42 acres. The following changes occurred during

(a)	Extent of compounded double crop land prior to resettlement.	3-62 acres
(b)	Extent transferred from single crop to permanent double crop S.Nos.1 B.C 106 A 109- 111 & 112 A other than those shown in (a)	1-32
	Total	164-94
(c)	Deduct area transferred to single crop out of the extent shown against (a) S.Nos. 4 and 20 and 382 A.	3-24
(e)	Total extent of permanent double crop according to Resettlement records	161-70
(d)	Add extent of double crop inam land since transferred to Government double crop.	1-72
	Total extent of double crop land at present.	163-42

A detailed list of fields is enclosed. (V)

Rupanagudi village, Bellary Taluk, Bellary District,

This petition raises a question which I have mentioned once or twice to my Hon. Coll. C_1.

There are wet lands under a spring channel in this village and people have to work hard on it, before they can irrigate their fields. Prior to resettlement these fields had a favourable rate i.e. those which were registered as double crop wet. It was 1 1/3 or 1 1/4th wet assessment. After resettlement, the rate has been fixed at $1\frac{1}{2}$. Now, let us grant that these fields were registered as single wet and that the owners raised a 2nd wet crop thereon. They would not be charged more than $\frac{1}{2}$ wet as fasli jasti. If, in any year, they did not raise a 2nd crop, they would be spared the additional charge. The ryots petitioned that their fields may be registered as single wet but this has not bee done so far. I think that the fields concerned should be registered as single wet, for the usual wet rate or as double wet at the old favourable rate Some correspondence has taken place about this and I shall be glad to see the papers with the permissio of my Hon. Coll. C_1.

vide para 17(a) of Settlement notification no 4 of Po 1677/86 12-9-22 (K)

also para 11 of Report on ~~Bellary~~ Bellary Dt Po 87/86 16-1-26 (L)

A.R.
9-9-27.

J.F.H.
-27.

In December 1925, the Hon'ble Rajamata Kundaleri asked the following questions to state

(a) whether fields under every precious source of irrigation in Nuganapuri village Bellary Taluk, Bellary Dt had been Compulsorily registered as double crop wet land at 1½ times the single Crop wet assessment &

(b) whether the owners of the fields had been denied the option of Compounding the 'double crop' assessment at the favourable rates prescribed in the Board's Standing orders & if so why

In connection with this question a report was called for from the Board office. The collector's report is in pp 5-6 of P.O.R 353 Rev of 29.3.26 He reported that the only first irrigation source in Nuganapuri village was the Hagari river channel, that it had been placed in class I by the Settlement dept in view of the trouble & expense involved in clearing the Channel, that the supply in the channel was ordinarily sufficient to allow of two wet crops being raised on the ayacut per Acre but every year & that the Settlement

p 2a of P.O.R 353 (1)

(N)

that 2 wet crops has been regularly raised on the ayacut

kept
dept under S 17 (a) of the settlement
notification register an extent of
161 acres 2 70 cents as double crop

The collector also reported that
no objections were received from the
holders of lands under the survey to
the registry of the said lands as
double crop at the time of the hearing

the Board Considered that
the registry of the fields as permanent
double crop at the resettlement was
correct.

Please see H.M.C$_2$'s query on page 3 ante.

The Hagari Nadi Kalva, which is the source of irrigation for Rupenagudi village was placed in class IV both at the settlement and at the Resettlement.

Rates.

At Settlement. Wet rates varied from Rs.2-8-0 to Rs.6-0-0 an acre on single crop wet lands as shown below:--

Class or Taram.	Rate per acre. Single crop.
VI	6-0-0
VIII	4-0-0
X	2-8-0

No wet land was registered as permanent double crop at settlement. Option was given to compound the second crop charge at ¼ of the first crop assessment.

At Resettlement. Wet rates varied as shown below:-

Sett Rgn pm'n

Taram.	Rate per acre. Single crop.	Double crop.
VI	6-12-0	10-2-0
VIII	4-8-0	6-12-0
X		4-4-0 — No single crop land under this Taram.

The major portion of the wet ayacut was registered as permanent double crop wet at 1½ times the single crop assessment at resettlement in accordance with para 17 (a) of the Resettlement notification, as the supply in the channel was ordinarily sufficient to allow of two wet crops being raised on the lands and 2 wet crops had been regularly raised in previous years. On single crop wet lands option was given to compound the second crop charge at 1/5 of the single crop charge.

O & Cy-(k)

3/12/27.

My Hon. colleague will — I hope — see from the above that the ryots under the channel deserve consideration at his hands. The source remains under the same class as before the resettlement. The lands were formerly assessed as single crop wet-lands & the ryots could have compounded for double crop — by paying 1/4 extra in the 1st crop assessment. If these lands were held to be fit to be classed as double crop lands one would think that the compounded rate of 1 1/4 single would have been charged. Instead the charge has been fixed at 1 1/2. The ryots petitioned that the lands might be classed as single crop wet or before but this request was refused because they had not raised the objection at the time of the Resettlement — as if these people knew of the rules on the subject! Beyond the last sentence of the note of the Secy of 6-12-27, I do not know if there is any single crop-wet-lands under this channel. By law, the permission to the owners of these fields to the charge for 2nd crop compound at 1/5 the single wet is significant. Perhaps at another resettlement, these people may be compounded with the same situation or their friends of the other fields. H.M. C2 does not want me to go into them

10/12/29

to Secy

With reference to Secy's query as to ~~what~~ the following information is available ~~taken from~~ the Resettlement Register of the Village revised put up:

	Extent Gross Ac.	Extent Nimar Ac	Total Extent Ac
Single crop	10·37	26·57	36·94
Double crop	161·70	103·85	265·55
	172·07	130·42	302·49

The file may be circulated to Hon'ble Mr. Ghaznavi for perusal of Hon'ble Mr. Ghaznavi's remarks.

130·42
172·07

13·IX·27 13/12/27 14.1.28

I am afraid that I don't follow Mr. Ghaznavi's reasoning. The lands under ~~cultivation~~, Note 1, have been classed as double crop at resettlement under they had regularly grown & paid for 2 crops for a series of years before resettlement. They must have been fairly at 1½ acre for some years before the resett. This may be scraped. Please get the sett account & whatever it is called but show this.

15/1/28

Collectors letter on p 5 of F.O 35-3 of-

(N). dated 29.3.26. It will be seen therefrom that two wet crops had been regularly raised in previous year on the lands registered as double crop wet at the Resettlement.

2/ Attention is invited to Form F — Statement showing for each taluk, the extent of double crop cultivation during the last five faslis' on page 30 of the Resettlement manual. This is one of the forms which the Settlement Office has to submit along with the scheme report. The information for the Bellary Taluk is contained in the Statement — Appendix F on p 220 of

(J) F.O. 1332 Rev dy 21.7.22. Information regarding each village of the taluk is not however given in this statement, new information regarding the assessment levied on the land in the previous year.

3/ A draft memo to the Board orders is submitted for approval.

To Secy

Please see H M C$_2$'s remarks on page 6 ante, the memo on p 5 CF and the report on pp 7-8 CF.

The Collector reports that the extent of 161·70 acres in Ongarepudi p 7 CF village which was registered as double Crop wet at the resettlement was Compounded double crop land paying assessment at 1¼ the single crop wet assessment. But the Board has hinted that this Statement does not seem to be quite ~~is incorrect~~ as the Statement of double crop cultivation p 8 CF in the ~~district~~ village shows that some of the lands were single crop wet lands prior to the resettlement, and that in that case they would have been paying 1½ times the S.C assessment for the cultivation of two crops.

(31)

2. The extent of double crop land according to the resettlement accounts is 161.70 acres. Of this, the extent of 160.38 acres was compounded double crop land assessed at 1¼ times the single crop assessment before resettlement. The remaining extent of 1.32 acres was single crop wet land ~~Inc codes~~. It has not been reported whether this extent was paying 1½ times for raising two crops before it was taken to permit double crop But in any case the extent is small. The major portion of the ayacut which was, prior to Resett, paying 1¼ is now (ie) after Resett, paying 1½ times the S.C. assessment It is for orders whether the suggestion of Mr. Ranganatha Mudaliar at M on page 1 ante will be considered
